~~DO NOT CIRCULATE~~

25X1

1. The airfield was about 1 km northwest of Stankov (N 50/P 81), in the direction of Cecovice (N 50/P 82). The landing field, about 600x1,800 meters, was level and firm.
2. Brick buildings, probably hangars, were under construction at the field.
3. A three-engine plane and some gliders were seen aloft on an air day in the spring of 1950. \*

\* Comment. The report confirms the construction of a new airfield near Stankov, mentioned for the first time in a previous report. [redacted] If the reported size is correct, the airfield is too small for military purposes. It is, however, possible that the new airfield is to be used by the SNB Air Force. This belief is supported by the information that the airfield is located near the Czech border.
